MODEL DESIGN

The State Network operating model is structured as a set of minimum standards that all State Networks must follow in key operating areas to ensure a baseline of support to local networks, consistency in member value and experience, and the integrity of the Women's Council brand. Scalable options are suggested for larger networks to accommodate difference in capacity. State leaders are free to operate above these standards based on the needs and desires of local networks and members but must at a minimum meet each standard as a baseline of operation.

DESIGN CRITERIA

The Women's Council State Network operating model has been designed to satisfy the following criteria for how every State Network should operate:

- › Simple and intuitive
- › Supportive (of Local Networks)
- › Strategic, forward-looking and inspiring
- › Collaborative
- › Flexible, scalable
- › Consistent reflection of the Women's Council brand to both internal and external audiences
- › Nimble, efficient and sustainable
- › Focused, relevant
